

Activation Services

Host Analytics has worked closely with our valued customers for nearly a decade to deliver a comprehensive integrated CPM solution that eliminates the need for the long and overvalued services engagements of days gone by.

As a result, Host Analytics customers can take advantage of Host Analytics Activation Services as their business needs require, not as software of the past has dictated.

How Long Will My Activation Take?

Customers who select Host Analytics as their CPM solution have access to the Host CPM service within hours of the project kickoff. Complete solution configuration activities average 30 to 90 days depending on the depth and breadth of the solution we are activating, resulting in the **shortest time-to-value** possible.

How Can Host Analytics Offer This?

The answer is simple. Host Analytics has eliminated the software from the CPM equation. Software requires additional IT resources, expensive consultants and hardware purchases beyond its own installation, all of which add expense and time to software implementations. There is no magic, just an absence of software with an on-demand solution.

What Services Are Available?

Host Analytics provides all of the activation services needed for a **complete** production analytical solution for our customers.

Host Analytics Activation Services include:

- Project Management
- Strategy Review
- Best Practices Process Design
- Analysis & Integration of Systems and Data
- Fine Tune Reporting and Ad-hoc Analysis
- Activation Services
 - Data Loading
 - Budget Setup
 - Report Writing
 - Consolidation Setup
 - Balanced Scorecard Design
